XLVI | ARCUS

BUILT TO GROW YOUR BUSINESS

Technology that moves your business forward.

Websites, online stores and apps for growing businesses.

You get one point of contact from the first call to launch day, and you see the price and the launch date in writing before you pay a single rupee.

- Fixed price in writing
- Websites from ₹12,999
- You own the code and data
- 30 days of free support

TAMIL NADU, INDIA

Prices you can see before you call.

No “call us for a quote” mystery. These are starting prices for a standard project, and each one includes design, development and launch.

PROJECT	LIVE IN	FROM
Landing page One page, custom layout, form and WhatsApp button	3–5 days	**₹12,999**
Business website 5–10 pages on WordPress, SEO set up	2–3 weeks	**₹29,999**
Website redesign New look, faster, your content kept	1–2 weeks	**₹21,999**
Shopify store Theme set up, up to 50 products, payments	2–3 weeks	**₹39,999**
WooCommerce store Up to 50 products, UPI, Razorpay, GST invoices	3–4 weeks	**₹47,999**
Web app or portal Login, database, admin and one complete workflow	4–8 weeks	**₹1,49,999**
Mobile app Android and iPhone, first version	8–12 weeks	**₹2,59,999**
SaaS MVP Sign-up, plans, admin, first version	8–12 weeks	**₹3,89,999**

- After a free 30-minute call, you get a **fixed price for your exact project within 1–2 days**. The number we agree is the number you pay.

Six things every website and app gets, at no extra cost.

These are written into every proposal, whatever the size of the project or the budget.

01

Mobile-first

Designed for phones first, then tested on tablets, laptops and large screens.

02

Fast on 4G

We aim for a Google PageSpeed mobile score of 90+, so customers don't leave while pages load.

03

Found on Google

Technical SEO, page titles, sitemap and your Google Business Profile set up properly.

04

Enquiries tracked

Call, WhatsApp and form clicks counted, so you know what brings customers.

05

Easy to update

A simple admin panel and a handover session, so your team can change text, prices and photos.

06

Secure and backed up

HTTPS, security updates and backups, set up on hosting in your name.

NOT SURE WHAT YOU NEED?

Tell us what you want customers to do. We'll recommend the simplest option that works, even if it's just a landing page.

What our price covers, and what you pay the provider.

We take care of the whole setup, including the purchase. Everything is bought in your name and paid with your own card, directly to the provider, so the accounts always belong to you.

Included in our price

- Advice on the right domain and hosting
- Setting up domain, hosting and HTTPS
- Uploading and launching your site or app
- Business email, redirects, launch checks

Paid by you, directly to the provider

- Domain name, renewed every year
- Hosting or server plan
- Platform plans, such as Shopify
- Paid themes, plugins and app accounts

GOOD TO KNOW

- Accounts in your name, on your card
- You can switch providers at any time
- All logins are handed over to you
- A simple landing page can often run on free hosting

Running costs depend on the provider and plan, and are confirmed in your written quote.

WHAT SETS YOUR FINAL PRICE

- Number of pages, products or screens
- Payments, logins or bookings
- Extra languages and integrations
- Ready theme or fully custom design
- Writing, photos and product uploads

Each item is listed and priced in your quote, so the number we agree is the number you pay.

From first call to launch, in five steps.

You approve the design before we start building. After that, you get a weekly update and a private preview link you can open any time.

I **Free call** — WEEK 0
30 minutes on your goals, your customers and your budget.

II **Written proposal** — WITHIN 1–2 DAYS
Scope, what's not included, a fixed price and your launch date.

III **Design & build** — WEEKS 1–3
You approve the design first, then see weekly progress on a private preview link.

IV **Test & launch** — WEEKS 2–4
Checked on real phones and browsers, then live, with a handover session for your team.

V **Care** — ONGOING
30 days of free support, then an optional monthly plan.

Timings are for a business website. Web apps take 4–8 weeks and mobile apps 8–12 weeks.

HOW PAYMENT WORKS

Websites and stores
50% to start, 50% at launch.

Apps and SaaS
Three milestones, each tied to an approved build.

Every payment is listed in your written proposal before work begins.

We don't disappear after launch.

A website is never really finished. Plugins need updating, backups need taking, and someone has to notice when something breaks. That someone should be us, not your customers.

INCLUDED WITH EVERY PROJECT

30 days free

- Bug fixes, at no cost
- Small text and image changes
- Uptime and speed monitoring
- Backups and security checks

THEN, IF YOU CHOOSE

₹2,499 / month

- Core, theme and plugin updates
- Weekly backups
- Uptime and security monitoring
- Up to 1 hour of small edits a month
- A clear monthly report

RESPONSE TIMES · MON–SAT, 10:00–19:00 IST

ISSUE	WE RESPOND	FIXED
Critical Site, store or app down, payments failing	**Within 2 working hours**	By the next working day
Important A form or feature not working, slow pages	**Same working day**	Within 2 working days

> **Busy season? Book it in.**
>
> Running a festive sale, a product launch or an ad campaign? Tell us the dates at least two weeks ahead. We'll check everything beforehand and agree when we'll be on standby.

We started this for business owners like you.

Every business has a story behind it. Early mornings, savings put on the line, a family that believed in it before anyone else did. Your website should do justice to that story.

I

WHERE IT BEGAN

We kept hearing the same story.

A shop owner who paid for a website that never brought a single enquiry. A clinic whose developer stopped picking up the phone. A founder who waited six months for an app that never launched. Good people, working hard, let down by the people they trusted with their technology. XLVI Arcus started in 2026 because we wanted to be the ones who don't let them down.

II

HOW WE WORK

We treat your money like our own.

Before we write a line of code, you know the price, what's included and the day it goes live. You talk to the people building it, not a salesperson. Your domain, hosting and code are in your name from the first day, so you are never stuck with us.

III

WHERE WE'RE GOING

We want to be around for years.

We would rather have fifty clients who stay with us for ten years than five hundred who never call back. When your business grows, we want to be the ones who grow its website and software with it.

You built something worth being proud of.
Your website should feel the same.

The ONE behind it all.

Beschi Gnanaraj founded XLVI Arcus on a simple belief: every growing business deserves technology it can trust, built by people who care about its success as much as the owner does.

Over six years of building websites, online stores and web applications, he saw how businesses often struggled with missed deadlines, unexpected costs and a lack of accountability from technology partners.

That experience shaped the way he built XLVI Arcus. Today, he leads a growing team of designers and engineers, staying closely involved in every project and personally reviewing the work before it reaches a client.

For him, the real reward isn't just delivering a project. It's seeing a client recognise what their business can achieve with the right technology behind it.

Beschi Gnanaraj | Founder & Lead Engineer, XLVI Arcus
